ABOUT ME

Hardworking, responsible, attentive to details, creative. I devote my free time to drawing, literature, and studying English. I also like to spend time playing board games with my friends.

CAREER OBJECTIVE

I want to become a successful expert in the field of Information Technology and experienced Web Developer and Web Designer by channelizing my technical knowledge and skills to ensure personal and professional growth and to contribute to the prosperity of the organization. I am excited to start my career by joining a company composed of driven professionals who value creative problem solving.

NONCOMMERCIAL WORK EXPERIENCE

- As a coursework, I developed a client-server GUI-application with multithreading and MySQL database.
- There are two roles developed in the application: administrator and client. The administrator has the ability to manage the library's fund and users, issue books and manage the timely returns. The client has the opportunity to view the library's collection, borrow books, leave reviews, add books to favorite. (<https://github.com/alxzhtkv/CourseWork>)
- Have a experience in business modeling (described business models in UML, IDEF, EPC)
- Experience in developing projects on web programming(HTML,CSS, JS) and programming network applications (C++, Java)
